

Norseman Silver

April 1st 2023

Norseman Silver is actively exploring the Taquetren project in Rio Negro, Argentina, in preparation for a planned Q3, 2023 drill program.

COMPANY EXPOSURE
GOLD-SILVER-COPPER

MAIN PROJECT LOCATION
RIO NEGRO, ARGENTINA

STOCK SYMBOL
TSX-V: NOC OTCQB: NOCSF

Our recent discovery at Taquetren:

- 12.2 & 11.5 grams per tonne gold in outcrop
- 7.7% copper over 300 metres.
- Gold Ridge Zone measuring 2 x 0.5 km
- 5 km long corridor hosting Marth, Veta Nueva, Mirasol, Irma and Veta Juan targets

There is no history of previous base or precious metals exploration.

Norseman has an option to obtain a 100% interest in Taquetren, 600² km, 230² miles project

INVESTMENT HIGHLIGHTS

Management

Top-tier team with history of discoveries

Location

First mover advantage, virgin ground

Exploration Team

20+ years exploration experience in Argentina

Share Structure

Strong tightly held group of key investors

Rock chip samples collected averaged 7.7% copper over a strike length of 300 metres in a narrow vein structure(s) approximately 0.25m in width 7 samples in an overburden-covered area.

At the Irma target, the maximum gold values returned 12.2 & 11.5 gram per tonne. Our exploration teams have found no evidence of previous base or precious metal exploration in the area giving Norseman a clear first mover advantage.

The Taquetren project is located in SW Rio Negro Province, Argentina. Access is by high quality and well maintained paved and gravel roads. This under-explored district hosts several deposits, including Navidad in Chubut Province to the south, one of the largest silver deposits in the world (M&I: 632M Oz Ag contained in 155.2 Mt @ 127 g/t Ag, 0.85% Pb, 0.05% Cu, 150 g/t Ag Eq).

Other projects: British Columbia, Canada, Highly prospective for silver and copper mineralization.

- Silver Switchback, 55 km S-SE of Terrace
- Cariboo, 36 km W of Smithers
- Silver Vista, 55 km NE of Smithers
